DETAILED ACTION

Claim Rejections - 35 USC § 102

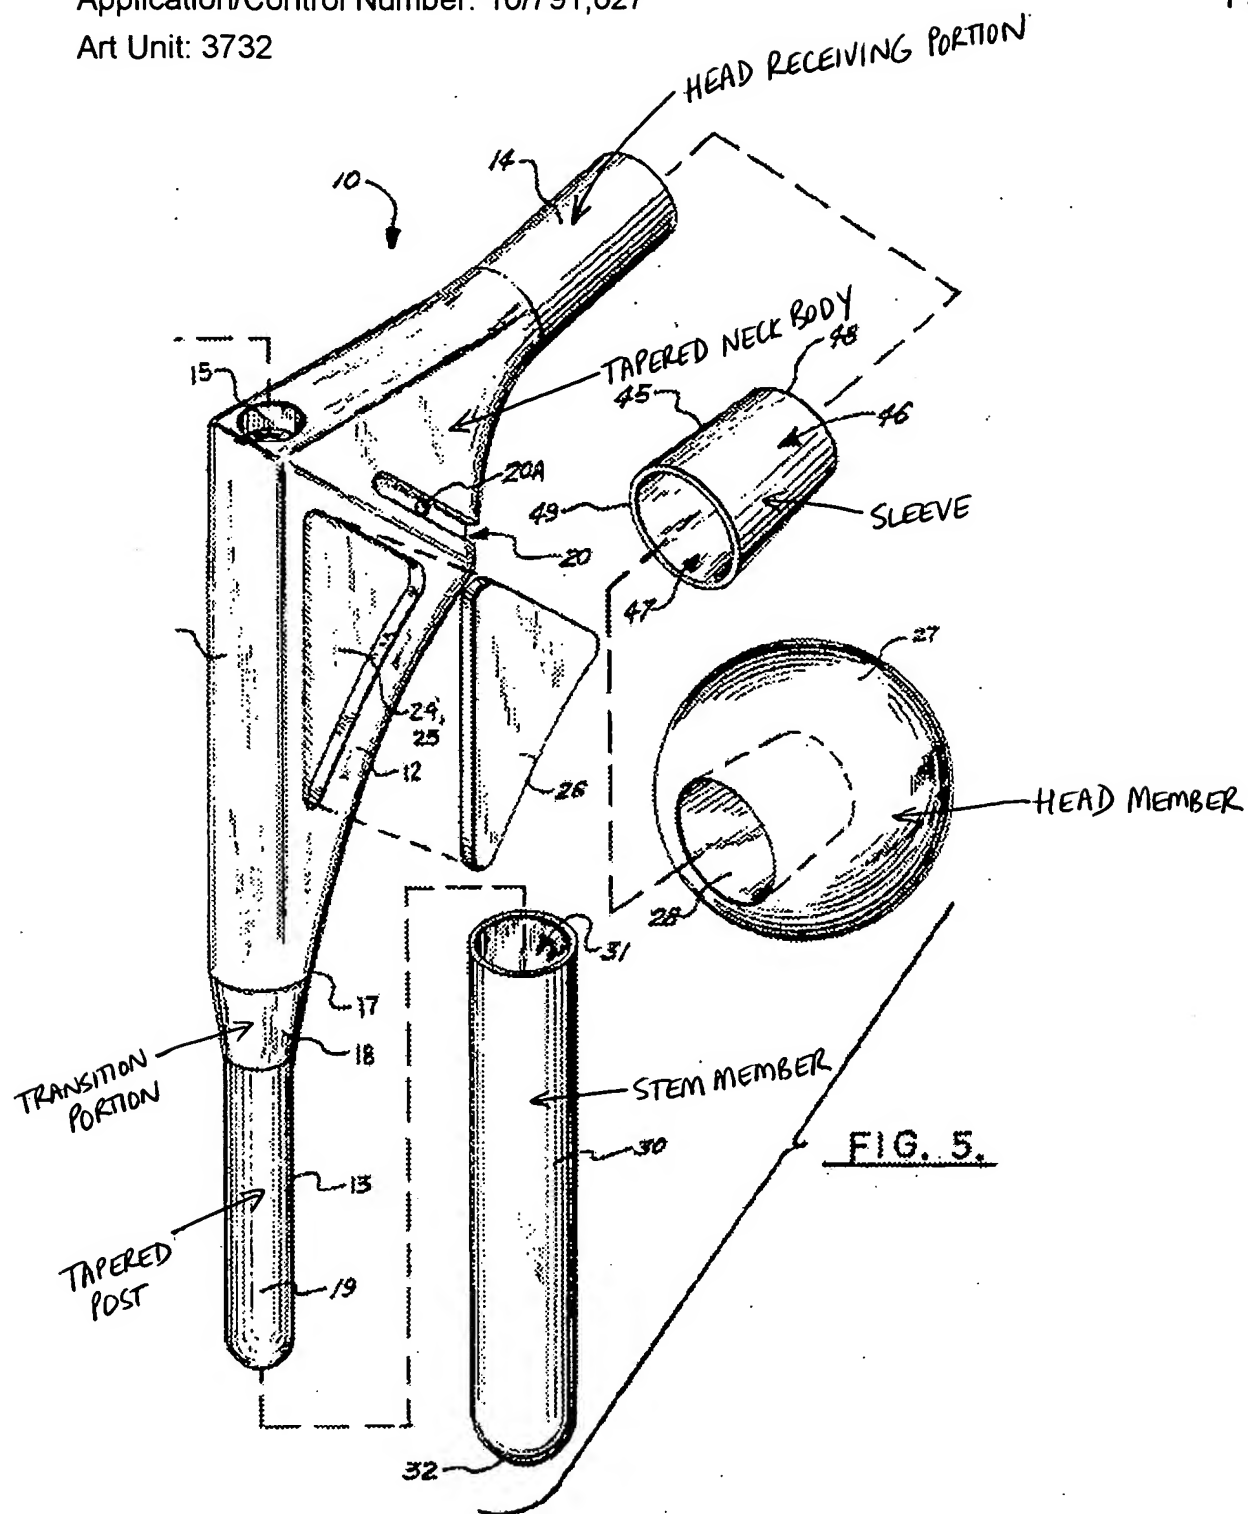

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

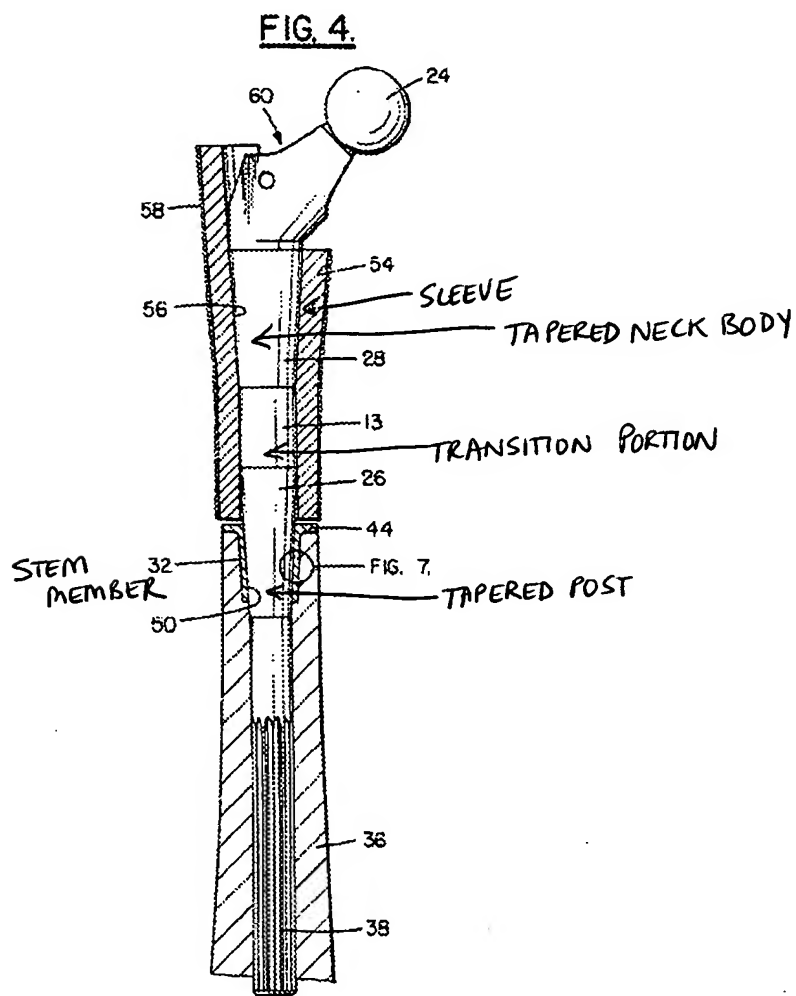

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Fallin (US 5,108,452).

Fallin discloses a modular prosthesis including a neck member having a head receiving portion 14, a tapered neck body, a tapered post 13, a head member 27 secured to the head receiving portion 14, a sleeve 46 having a first elongated bore and a stem member 30 wherein stem member 30 has a second elongated bore receiving the tapered post 13 of the neck member and stem member 30 is located completely outside the first elongated bore (Figs. 5 and 14, col. 6, lines 13-68 and col. 7, lines 1-50). See marked up Fig. 5 on the following page.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 13-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brooks et al. (US 5,658,349) in view of Fallin (US 5,108,452).

Brooks et al. disclose all elements of the claimed invention except for a separate head member received on a head-receiving portion of the neck member.

Fallin teaches a separate head member received on a neck member to enable provision of a plurality of heads of different sizes (col. 7, lines 51-54).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided a separate head member received on a head-receiving portion of a neck member Brooks et al. prosthesis, as taught by Fallin, to enable provision of a plurality of heads of different sizes in the modular prosthesis of the combination of Brooks et al. and Fallin.

Response to Arguments

Applicant's arguments with respect to claims 1 and 4-20 have been considered but are moot in view of the new grounds of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3732

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
